CONTENTS OF VOLUME 49

January **Number 1**

R. BARR: The diffraction of VLF radio waves by the Antarctic ice cap 1

H. KELDER and T. A. TH. SPOELSTRA: Medium scale TIDs observed by radio interferometry and differential Doppler techniques 7

G. G. BOWMAN: Some effects of geomagnetic activity on spread-*F* occurrence and ionospheric height variations in equatorial regions 19

K. MOHANAKUMAR: A search for a solar cycle–temperature relationship in the middle atmosphere over Volgograd 27

H. VOLLAND, M. SCHMOLDERS, G. W. PRÖLSS and J. SCHÄFER: VLF propagation parameters derived from sferics observations at high southern latitudes 33

A. J. SMITH, A. S. RODGER and D. W. P. THOMAS: Simultaneous ground-based observations of the plasmapause and the *F*-region mid-latitude trough 43

M. A. HAPGOOD and B. S. LANCHESTER: A narrow auroral arc observed with EISCAT . 49

P. K. CHATURVEDI, M. J. KESKINEN and S. L. OSSAKOW: Production and control of ion-cyclotron instabilities in the high latitude ionosphere by high power radio waves . 57

Y. MAEKAWA, S. FUKAO, I. HIROTA, M. P. SULZER and S. KATO: Some further results on long term mesospheric and lower thermospheric wind observations by the Arecibo UHF radar 63

Y. MAEKAWA, S. FUKAO and S. KATO: Vertical propagation characteristics of internal gravity waves around the mesopause observed by the Arecibo UHF radar . . . 73

V. V. KOSHELEV: The winter anomaly in the ionospheric *D*-region—some numerical calculations 81

S. SUKUMAR, T. A. TH. SPOELSTRA and H. KELDER: Multipath effects in UHF angle-of-arrival measurements 99

February **Number 2**

J. A. WALDOCK and T. B. JONES: Source regions of medium scale travelling ionospheric disturbances observed at mid-latitudes 105

N. MATTIN and T. B. JONES: Propagation angle dependence of radar auroral *E*-region irregularities 115

B. S. N. PRASAD and J. TAUBENHEIM: Estimates of mesospheric water vapour based on *D*-region ion composition data 123

O. I. PINTADO, S. M. RADICELLA and P. M. FERNÁNDEZ: Experimental estimates of electron density variations at the reflection height of VLF signals 129

SONG XIAO-TING and G. CAUDAL: Electron density near the plasmapause measured over one year by GEOS-2: a statistical analysis 135

P. R. ROBINSON, H. J. DOWSWELL and R. A. HAMILTON: The effect of geomagnetic activity on north polar currents in winter 145

J. M. FORBES and G. V. GROVES: Diurnal propagating tides in the low-latitude middle atmosphere 153

G. G. BOWMAN, G. S. DUNNE and D. W. HAINSWORTH: Mid-latitude spread-*F* occurrence during daylight hours 165

R. J. MANN and D. M. SCHLAPP: The day-to-day variability of *Sq* in geomagnetically conjugate areas 177

C. A. REDDY, B. T. VIKRAMKUMAR and K. S. VISWANATHAN: Electric fields and currents in the equatorial electrojet deduced from VHF radar observations—I. A method of estimating electric fields 183

K. S. VISWANATHAN, B. T. VIKRAMKUMAR and C. A. REDDY: Electric fields and currents in the equatorial electrojet deduced from VHF radar observations—II. Characteristics of electric fields on quiet and disturbed days 193

B. T. VIKRAMKUMAR, P. B. RAO, K. S. VISWANATHAN and C. A. REDDY: Electric fields and currents in the equatorial electrojet deduced from VHF radar observations—III. Comparison of observed ΔH values with those estimated from measured electric fields 201

March **Number 3**

C. L. BHAT, M. L. SAPRU, R. K. KAUL and H. RAZDAN: Response of 'atmospheric' lightning to systematic changes in the global electric field 209

A. TZANIS and D. BEAMISH: Time domain polarization analysis of Schumann resonance waveforms 217

A. W. V. POOLE and P. R. SUTCLIFFE: Mechanisms for observed total electron pulsations at mid latitudes 231

M. J. BUONSANTO: Diurnal variations in $F2$ peak density and ionization flux above Tahiti 237

D. OLSSON-STEEL and W. G. ELFORD: The height distribution of radio meteors: observations at 2 MHz 243

J. K. HARGREAVES, M. T. FEENEY, H. RANTA and A. RANTA: On the prediction of auroral radio absorption on the equatorial side of the absorption zone 259

K. IGARASHI and K. SCHLEGEL: Electron temperature enhancements in the polar *E*-region measured with EISCAT 273

K. M. GREISIGER, R. SCHMINDER and D. KÜRSCHNER: Long-period variations of wind parameters in the mesopause region and the solar cycle dependence 281

D. B. JENKINS, D. P. WAREING, L. THOMAS and G. VAUGHAN: Upper stratospheric and mesospheric temperatures derived from lidar observations at Aberystwyth 287

C. C. GALLAGHER: Inorganic bromine in the lower stratosphere 299

April **Number 4**

G. VON COSSART and J. TAUBENHEIM: Solar cycle and long-period variations of mesospheric temperatures 303

N. R. THOMSON: Experimental observations of very low latitude man-made whistler-mode signals 309

N. R. THOMSON: Ray-tracing the paths of very low latitude whistler-mode signals 321

B. G. HUNT: Excitation and propagation of middle atmospheric internal gravity waves in a general circulation model 339

R. A. VINCENT, P. T. MAY, W. K. HOCKING, W. G. ELFORD, B. H. CANDY and B. H. BRIGGS: First results with the Adelaide VHF radar: spaced antenna studies of tropospheric winds 353

K. L. JONES and J. D. WHITEHEAD: Dynamo action in sporadic-*E* formation 367

W. D. GONZALEZ, S. L. G. DUTRA and O. PINTO JR: Middle atmospheric electrodynamic modification by particle precipitation at the South Atlantic Magnetic Anomaly 377

A. EBEL, A. H. MANSON and C. E. MEEK: Short period fluctuations of the horizontal wind measured in the upper middle atmosphere and possible relationships to internal gravity waves 385

May **Number 5**

M. S. S. MACEDO MOURA and J. R. C. ABRAHÃO: Night-time electron density of the lower ionosphere in the South Atlantic Geomagnetic Anomaly region obtained with a LF/VLF oblique ionosonde 403

H. TEITELBAUM, H. KELDER and C. A. VAN DUIN: Propagation of internal gravity waves in a rotating fluid with shear flow 413

S. J. FRANKE and C. H. LIU: Analysis of a long period fading component in saturated VHF amplitude scintillation observed at Ascension Island 421

V. M. SOMSIKOV: A spherical model of wave generation in the atmosphere by the solar terminator 433

R. P. KANE: Longitudinal difference in the *Sq* profiles in the South American region .. 439

I. M. REID and R. A. VINCENT: Measurements of mesospheric gravity wave momentum fluxes and mean flow accelerations at Adelaide, Australia 443

T. TSUDA, T. NAKAMURA and S. KATO: Mean winds observed by the Kyoto meteor radar in 1983–1985 461

I. M. REID: Some aspects of Doppler radar measurements of the mean and fluctuating components of the wind field in the upper middle atmosphere 467

R. RAGHAVARAO, S. P. GUPTA, R. SEKAR, R. NARAYANAN, J. N. DESAI, R. SRIDHARAN, V. V. BABU and V. SUDHAKAR: *In situ* measurements of winds, electric fields and electron densities at the onset of equatorial spread-*F* 485

E. LOBSIGER: Ground-based microwave radiometry to determine stratospheric and mesospheric ozone profiles 493

June **Number 6**

G. J. BAILEY, P. A. SIMMONS and R. J. MOFFETT: Topside and interhemispheric ion flows in the mid-latitude plasmasphere 503

A. SINGH and K. D. COLE: A numerical model of the ionospheric dynamo—I. Formulation and numerical technique 521

A. SINGH and K. D. COLE: A numerical model of the ionospheric dynamo—II. Electrostatic field at equatorial and low latitudes 529

A. SINGH and K. D. COLE: A numerical model of the ionospheric dynamo—III. Electric current at equatorial and low latitudes 539

S. GANGULY and D. COCO: Incoherent scattering from the collision dominated *D*-region. Comparison of theories with experimental data 549

P. L. DYSON and J. A. BENNETT: The application of a new method for determining irregularity parameters from topside ionograms 565

T. BÖSINGER and U. WEDEKEN, *Pi1B* type magnetic pulsations simultaneously observed at mid and high latitudes 573

A. R. JACOBSON, D. J. SIMONS and G. NALESSO: A model of ionospheric image structure underneath a braking, cross-field plasma jet 599

July/August **Numbers 7/8**

MAP/WINE

U. VON ZAHN: The project MAP/WINE: an overview 607

K. PETZOLDT, R. LENSCHOW, A. HAUCHECORNE, G. A. KOKIN, W. MEYER, A. O'NEILL, C. R. PHILBRICK, F. SCHMIDLIN and R. THOMAS: Large scale structure of the stratosphere and the lower mesosphere (20–60 km) over the northern hemisphere during the MAP/WINE campaign 621

K. LABITZKE, A. H. MANSON, H. G. MUELLER, Z. RAPOPORT and E. R. WILLIAMS: Hemispheric synoptic analysis of 95 km winds during the winter of 1983/1984 and comparison with stratospheric parameters 639

A. HAUCHECORNE, T. BLIX, R. GERNDT, G. A. KOKIN, W. MEYER and N. N. SHEFOV: Large scale coherence of the mesospheric and upper stratospheric temperature fluctuations 649

D. OFFERMANN, R. GERNDT, R. KÜCHLER, K. BAKER, W. R. PENDLETON, W. MEYER, U. VON ZAHN, C. R. PHILBRICK and F. J. SCHMIDLIN: Mean state and long term variations of temperature in the winter middle atmosphere above northern Scandinavia 655

W. MEYER, C. R. PHILBRICK, J. RÖTTGER, R. RÜSTER, H.-U. WIDDEL and F. J. SCHMIDLIN: Mean winds in the winter middle atmosphere above northern Scandinavia 675

J. RÖTTGER and W. MEYER: Tidal wind observations with incoherent scatter radar and meteorological rockets during MAP/WINE 689

H. HASS and W. MEYER: Gravity wave fields above Andøya 705

H.-U. WIDDEL: Vertical movements in the middle atmosphere derived from foil cloud experiments 723

R. RÜSTER and J. KLOSTERMEYER: Propagation of turbulence structures detected by VHF radar 743

E. V. THRANE, T. A. BLIX, C. HALL, T. L. HANSEN, U. VON ZAHN, W. MEYER, P. CZECHOWSKY, G. SCHMIDT, H.-U. WIDDEL and A. NEUMANN: Small scale structure and turbulence in the mesosphere and lower thermosphere at high latitudes in winter 751

F.-J. LÜBKEN, U. VON ZAHN, E. V. THRANE, T. BLIX, G. A. KOKIN and S. V. PACHOMOV: *In situ* measurements of turbulent energy dissipation rates and eddy diffusion coefficients during MAP/WINE 763

E. R. WILLIAMS, G. W. WATKINS, T. A. BLIX, E. V. THRANE, G. ENTZIAN, G. VON COSSART, K. M. GREISIGER, W. SINGER, J. TAUBENHEIM, M. FRIEDRICH, C. M. HALL, J. R. KATAN, J. LASTOVICKA, B. A. DE LA MORENO, S. V. PAKHOMOV, H. RANTA, Z. TS. RAPOPORT, V. M. SINELNIKOV, D. SAMARDJIEV, G. NESTOROV, H. H. SAUER and P. STAUNING: The ionosphere: morphology, development and coupling 777

D. KRANKOWSKY, P. LÄMMERZAHL, A. GÖTZELMANN, M. FRIEDRICH and K. M. TORKAR: Positive ion composition in the lower ionosphere at high latitudes during MAP/WINE 809

K. SCHLEGEL and J. RÖTTGER: Thermodynamics and electrodynamics of the auroral *E*-region during the D salvo of the MAP/WINE campaign 819

K. U. GROSSMANN, H. G. BRÜCKELMANN, D. OFFERMANN, P. SCHWABBAUER, R. GYGER, K. KÜNZI, G. K. HARTMANN, C. A. BARTH, R. THOMAS, A. F. CHIJOV, S. P. PEROV, V. A. YUSHKOV, P. GLÖDE and K. H. GRASNICK: Middle atmosphere abundances of water vapor and ozone during MAP/WINE 827

P. H. G. DICKINSON, G. WITT, A. ZUBER, D. MURTAGH, K. U. GROSSMAN, H. G. BRÜCKELMANN, P. SCHWABBAUER, K. D. BAKER, J. C. ULWICK and R. J. THOMAS: Measurements of odd oxygen in the polar region on 10 February 1984 during MAP/WINE 843

J. C. ULWICK, K. D. BAKER, D. J. BAKER, A. J. STEED, W. R. PENDLETON JR, K. GROSSMANN and H. G. BRÜCKELMANN: Mesospheric minor species determinations from rocket and ground-based i.r. measurements 855

U. VON ZAHN, K. H. FRICKE, R. GERNDT and T. BLIX: Mesospheric temperatures and the OH layer height as derived from ground-based lidar and OH* spectrometry 863

September **Number 9**

R. BOSTRÖM and H. DERBLOM: Obituary—Willy Stoffregen (1909–1987) 871

P. J. S. WILLIAMS and J. N. MCDONALD: Electron temperature and electron density in the *F*-region of the ionosphere. II. The role of atomic oxygen and molecular nitrogen 873

M. P. HICKEY and K. D. COLE: A quartic dispersion equation for internal gravity waves in the thermosphere 889

G. L. WRENN, A. S. RODGER and H. RISHBETH: Geomagnetic storms in the Antarctic *F*-region. I. Diurnal and seasonal patterns for main phase effects 901

H. G. BOOKER and JING-WEI TAO: A scintillation theory of the fading of HF waves returned from the *F*-region: receiver near transmitter 915

H. G. BOOKER, JING-WEI TAO and A. B. BEHROOZI-TOOSI: A scintillation theory of fading in long distance HF ionospheric communications 939

October **Number 10**

V. P. BHATNAGAR and G. G. SHEPHERD: A study of the meridional structure of the equatorial red arcs in the night-time ionosphere from the ISIS-II satellite 959

D. K. CHAKRABARTY, G. BEIG, J. S. SIDHU, H. CHAKRABARTY, R. NARAYANAN, N. K. MODI, S. R. DAS and P. CHAKRABARTY: Measurement of the eddy diffusion coefficient of the middle atmosphere from a balloon at low latitude 975

R. SEKAR and R. RAGHAVARAO: Role of vertical winds on the Rayleigh–Taylor mode instabilities of the night-time equatorial ionosphere 981

K. LABITZKE, A. H. MANSON, J. J. BARNETT and M. CORNEY: Comparison of geostrophic and observed winds in the upper mesosphere over Saskatoon, Canada .. 987

G. R. A. ELLIS and G. T. GOLDSTONE: Observations of long delayed echoes 999

G. G. BOWMAN: Small scale stratification of the mid-latitude *F*-region 1007

J. K. WALKER: Adaptive separation of regular and irregular magnetic activity for *K* indices 1017

A. BREKKE, T. FEDER and S. BERGER: *Pc*4 giant pulsations recorded in Tromsø, 1929–1985 1027

I. M. REID and R. A. VINCENT: Measurements of the horizontal scales and phase velocities of short period mesospheric gravity waves at Adelaide, Australia 1033

November/December **Numbers 11/12**

M. I. PUDOVKIN, A. M. LYATSKAYA and I. V. GOLOVCHANSKAYA: The influence of ionization and recombination processes on the dynamics of ionospheric plasma clouds 1049

A. H. MANSON, C. E. MEEK, J. L. FELLOUS and M. MASSEBEUF: Winds oscillations (~6 h–6 days) in the upper middle atmosphere at Monpazier (France, 45°N,1°E) and Saskatoon (Canada, 52°N, 107°W) in 1979–1980 1059

V. N. LAXMI and V. K. TRIPATHI: Radio wave heating and equatorial spread-*F* 1071

L. LICHTENBERGER, D. HAMAR and L. CSEREPES: Computation of whistler wave normals using a combined matched filtering and parameter estimation technique ... 1075

S. SHIMAKURA, A. TSUBAKI and M. HAYAKAWA: Very unusual low latitude whistlers with additional traces of the Earth–ionosphere waveguide propagation effect 1081

M. J. BUONSANTO and J. E. TITHERIDGE: Diurnal variations in the flux of ionisation above the *F*2 peak in the northern and southern hemispheres 1093

P. A. BERNHARDT and L. M. DUNCAN: The theory of ionospheric focused heating 1107

W. K. HOCKING: Reduction of the effects of non-stationarity in studies of amplitude statistics of radio wave backscatter 1119

R. G. RASTOGI and S. ALEX: Day-to-day variability of ionospheric electron content at low latitudes 1133

I. A. ANSARI, and B. J. FRASER: A study of wave packets and phase jumps in low latitude *Pc*3 geomagnetic pulsation 1139

L. HOLLÓ and J. VERŐ: Comparison of one year of data on geomagnetic pulsations at geostationary orbit and at a low latitude ground station 1147

G. CROWLEY, T. B. JONES and J. R. DUDENEY: Comparison of short period TID morphologies in Antarctica during geomagnetically quiet and active intervals 1155

Short paper

K. PFEILSTICKER and F. ARNOLD: Perturbation of middle atmospheric ion composition measurements by telemetry-induced radio wave ionisation 1163

International Geophysical Calendar 1988 1169
